

## **“Stabilize, Monitor, and Clear Your Most Complex Cases — All from Home”**

### **Better Outcomes = Lower Cost**

- Ensure timely medical milestones, reduce costs, and minimize litigation exposure through proactive care.

### **Rapid Pre-Op Optimization**

- Avoid surgical delays. We stabilize high-risk patients at home with real-time telemetry and 24/7 oversight, expediting clearance.

### **Continuous Monitoring Post-Injury**

- Remote cardiac telemetry detects decompensation early — preventing complications, ER visits, and costly readmissions.

### **Clear Lines of Communication**

- We coordinate with UR teams, attorneys, adjusters, and physicians — delivering real-time updates and documentation.

### **Faster Case Resolution**

- Healthier patients clear faster. Our AI-supported system promotes recovery, compliance, and optimized return-to-work timelines.

# H4

**Home Heart Hospital Halo™ – ICU-  
Level Monitoring for Complex and  
Catastrophic Workers' Comp Cases**

**The World's 1st 24/7 Integrated, Real-time,  
Personalized Monitoring Platform**

***“AI-Powered, Clinician-Backed,  
Patient-Focused.”***

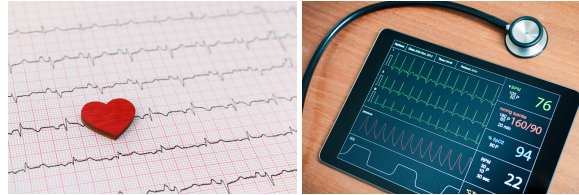

## "A Decade of Proven Clinical Innovation"

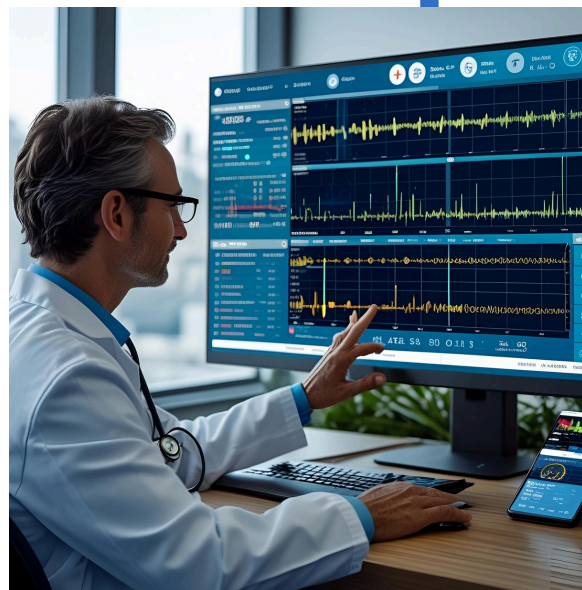

- Patented H3 → H4 evolution — pioneers in home-based acute care.
- Over 10 years of data [12 Lead ECG] on hospital-level telemetry in homes, ALFs, and nursing facilities.
- First to offer personalized 12-lead ECG and wireless ICU-grade telemetry 24/7 at home.
- Over 6,000 ECGs performed - by patient or Caregiver- with clinically validated outcomes.
- Leadership includes board-certified cardiologists, intensivists and experienced hospital-at-home physicians.

**"We built this model before hospital-at-home was a trend—because lives depended on it."**

# "FDA-Cleared AI ECG – A New Standard in Cardiac Monitoring"

- Exclusive use AI-ECG in the US with first FDA approval 7 years ago
- Detects ~100 arrhythmias for in-patients currently active in 1,000+ hospitals
- Enables early detection of Acute Coronary Syndrome | Acute MI
- Clinician-in-the-loop triage - Alerts routed directly to StreamCare's clinical command center

## "The Data Speaks: Fewer Admissions, Faster Care"

- 📉 78% reduction in hospital admissions for acute events
- 🕒 24/7 physician oversight with immediate interventions
- 💡 30–50% decrease in readmissions and emergency room visits
- 💰 Significant cost savings per patient episode
- We're not just H@H — we deliver **SDU@Home (Step-Down ICU)**
